# Products

MJW has unrivalled expertise in the manufacturing of tooling used primarily in the production of components for the automotive and aerospace industries plus small jigs and fixtures.

All our components are manufactured in mild steel, carbon steel, tool and die steels including carbide and may be supplied in the heat-treated and un-heat treated condition.

# Quality

BS EN ISO 9001: 2000 Certificate No. FM 54871

# Company

We at MJW offer our customers the benefit of a wide range of precision machined components, manufactured in our modern toolroom, meeting the demands & needs from a variety of industrial sectors which include the metallurgical & metal working industry, air & aircraft manufacturing industry & medical sector

# Investment

It is our policy to continually monitor and seek more innovative methods which have enabled new products to be continually developed and allows our end users – you the customer – to remain competitive and to provide our customers with the products they required.
